MRF Drilling and Completion Cost Enhancement Screen Examples

December 2019

By acceptance of the attached material, all parties acknowledge that all material released by Petrinex is to be used for the sole purpose as agreed to by Petrinex. This material shall not be used for any other purpose or disclosed to any other party without prior approval by Petrinex.

Purpose of these examples

The process for submitting Drilling and Completion Costs (DCC) will be changing effective 2019 reporting (done in 2020).

This change will require licensee to report at the license level not by UWI (unique well identifier).

The following are examples of the new screens and brief notes about how to report using the new process.

The Go-live date for the new reporting is February 6, 2020.

The current DCC training modules in the Petrinex Learning Centre are being updated to reflect these changes and will be available prior to go-live.

New DCC Dashboard

Users can quickly find all the licenses they are responsible for reporting. Filters are available to show any errors, submissions status and if a C* amount has been calculated. Users can quickly access both the edit and query functions directly from the Dashboard.
