

IOGC Town Hall Session – Royalty Information Session

Over the past few years, Indian Oil and Gas Canada (IOGC), a Special Operating Agency of Indigenous Services Canada (ISC), has been embarking on multiple initiatives, including the modernization of our royalty systems and processes.

A few areas of system and process enhancements include:

1. Incorporation of Mix/Spec Product Pricing (as implemented by Alberta Energy in July 2014);
2. Implementation of the Modernized Royalty Framework (as implemented by Alberta Energy in 2017); and,
3. Implementation of a GCA platform within the Petrinex platform (already implemented in February 2019, with future enhancements).

The majority of the above processes and tools will be officially implemented within the enhanced IOGC infrastructure in January 2023. Hence, the IOGC Royalty Team has organized the following Town Hall Sessions, to engage and to communicate information of the upcoming system changes, new reporting processes, and address any questions you may have.

Town Hall Session Dates:

To ensure the most effective use of time and to offer added flexibility in participation, there will be three separate event registrations, one for each session below. You only need to attend one session, but are more than welcome to attend multiple sessions if you wish.
