

Registry Alert

Changes to Reports

Release/Revision Date	Location of change in this document	Comment
July 31, 2007		Initial release

Audience:

All Stakeholders

Purpose:

This Alert informs stakeholders about changes to report parameters allowing for more timely information.

Background:

Effective August 2, 2007, there has been changes made to the following reports:

Allocation – OAF Report – Users can now request a **daytime** report for 1 production month, 1 operator and 1 reporting facility. Any other combinations will continue to process in the nightly queue.

Allocation – WIO Report – Users can now request a **daytime** report for 1 production month, 1 reporting facility. All other combinations will continue to process in the nightly queue.

Production Entity Report – This **daytime** report replaces the Well to Production Entity Links Report and provides the same information that is currently viewed on the Production Entity Query Screen. This report now displays royalty attributes as well as well links.

Allocation – SAF Report – There are now parameter restrictions on this **nightly** report. User can now only request a report for 1 – 12 production months.

More information:

There is additional information on the Registry Website's Bulletin Board/Documents: Reference & Historical/Reference Material entitled "Guidelines for Setting Report Parameters for Running of Reports" and a table outlining the current report parameters for reports on the daily queue and nightly reports with restricted parameters.

Or Contact the Registry Service Desk.
