

## Timing of DOE Allowable Cost Responses

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB	March 28, 2023		Update of the entire document
AB	February 11, 2010	Update information	AC4 is no longer applicable for Production Year 2009 and Onward
AB	May 03, 2006		Initial Release

**Audience:** Alberta Stakeholders

**Purpose:** This Tip outlines the timing of Petrinex/DOE responses for Allowable Costs Set-up and Editing.

**Key Principles:** The DOE has two different maximum turnaround time targets for approval of Allowable Cost submissions.

**Set-up**

*This only applies to the AC1 - Setup.*

When setting up a new Facility Cost Centre (FCC), certain initial edits are completed in Petrinex, and other processes are completed in DOE systems. The initial Petrinex edits are completed in near real time. The DOE maximum response time is four hours.

For example: If an AC1 is submitted in the morning, a response will be received in the afternoon. If an AC1 is submitted in the afternoon, a response will be received the following morning.

**Editing**

*This applies to AC1-5*

Note: For Production Year 2009 and onwards, the AC4 is no longer valid.

# TIP

When editing an AC1-5, certain initial edits are completed in the Petrinex, and other processes are completed in DOE systems. The initial Petrinex edits are completed in near real time. The DOE response will be received by the following business day, EXCEPT during the DOE Gas Royalty Invoice Cycle.
