

Petroleum Registry of Alberta

Registry Tip

New Miscellaneous Code AB LF (Line fill)

Release/Revision Date	Location of Change in this Document	Comment
August 15, 2011		Initial Release

Audience: All Stakeholders

Purpose: To advise Industry that effective August 2, 2011 the ERCB has created a **NEW** Miscellaneous code **AB LF** in the Petroleum Registry for use when there is line fill.

Background: Line fill is used either at the beginning of a facility to get the product flowing or at the end of a line to clean it out when decommissioning the facility.

Key Principles: The operator of a facility will enter either a REC or a DISP From/To AB LF when products have been produced or processed and used as line fill for any production month.

Note: This should only be reported at the beginning and decommissioning of a facility.

More information: Please contact the PA Help Desk.
