

New Volumetric Load Inventory Report

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB/SK	Mar 12, 2014	Background	Additional selection – Activities as of Feb 2014
AB/SK	Nov 26, 2013		Initial Release

Audience: All AB and SK users

Purpose: To inform users of the new Volumetric Load Inventory Report that is now available for use by Industry.

Background: Effective November, 2013 the Volumetric Load Inventory Report was made available in Petrinex for industry's use. This new report displays volumetric activity involving load inventory (LDINVOP, LDINVCL, LDINVADJ, LDINJ, LDREC) for the last reporting month only. Users will be able to filter for the selection of Operated Well ID, by Well Status (All, Suspended, or Producing), by load inventory Activity and/or by Facility ID.

The report is available under the Reports & Queries menu, Submit Report Request and is available in both PDF and CSV format. The report parameters can also be saved and uploaded under the Upload Report Request option.

A request was made by the Petrinex Industry Team for an enhancement to add an additional activity filter to allow users to narrow the selection further and request only those wells with outstanding load inventory balances. This enhancement is currently being tracked through our change management process for implementation in the near future.

More information: Please contact the PETRINEX Service Desk.
