

New Functionality – Query Licence and Request Licence Report

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB/SK	April 9, 2014		Initial Release

Audience: All Users

Purpose: To inform users about changes that were implemented in Petrinex on April 2, 2014 related to the Query Licence, and Request Licence Report.

Background: Effective April 3, 2014 new queries were made available in Petrinex for industry's use. The task to run these queries has been added to the Petrinex Comprehensive and Read Only Roles. The Query Licence is used to view licence information for selected wells or facilities, and can be accessed either from Facility Infrastructure or from Well Infrastructure.

Users are given the choice to pick the licence type W (well) or F (facility), and can be queried by licence number, licensee or location.

Note: Industry is encouraged to use the Query Licence – Facility to find facility licence information when requesting a new Facility ID. However if you are querying facility information you would still use the Query Facility Information task or request the Facility Infrastructure Report.

As part of this release the Request Well Licence Report was updated and renamed to Request Licence Report. This new report can be requested to display the licence information for Wells, Facilities or both.

TIP

The report is available under the Reports & Queries menu, Submit Report Request and is available in PDF, XML and/or CSV format.

A new enhancement has been requested by the Petrinex Team to allow the report parameters to be saved and uploaded under the Upload Report Request option. This update has been scheduled at a later date and we will provide additional information as to the timing of this change.
