

New EPAP Declaration Facilities Report

| Jurisdiction | Release/Revision Date | Location of Change in this Document | Comment |
|--------------|-----------------------|-------------------------------------|-----------------|
| AB | Aug 26, 2015 | | Initial Release |

- Audience:** AB Enhanced Production Audit Program (EPAP) users.
- Purpose:** To inform EPAP users of the new EPAP Declaration Facilities Report that will be available as of September 3, 2015.
- Background:** A request was made at the EPAP Stakeholder meeting in April, 2015 to develop a report that would provide facility lists for the EPAP declaration that were more reliable than the Facility Infrastructure Report.
- The EPAP Declaration Facilities Report will be available to Industry on September 3, 2015 on the Petrinex Menu under Reports & Queries, Submit Report Request. This report provides a list of facilities, by declaration theme, and is generated using the same methodology as the declaration process uses when creating the official declaration facility lists. The report is available in a CSV format only.
- Key Principles:** This is an Industry only (user request) report, available to those users who have the ability to edit or query the EPAP declaration.
- The facility lists returned in the report are only accurate for the specific date the report is generated. The report will return all facilities applicable so far to a declaration reporting theme that are currently operated and have made a volumetric submission at any time during the current declaration period (based on the

TIP

declaration month set in the Audit Program information).

Note: This report is NOT the official declaration facility list. The ONLY official listings of facilities are those that are included in the declaration that is created at the end of the declaration period. Timing differences may exist between the official declaration and any instance of this report that is run prior to the end of the declaration period. For this reason, the date the report was generated is included in the report details.
