

**Hydraulic Fracturing Fluid Composition Data Submitted to the AER Displayed on Petrinex**

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB	November 7, 2016		Initial Release

**Audience:** All stakeholders

**Purpose:** To notify stakeholders that hydraulic fracture fluid composition data submitted to the AER is displayed at the stage level on Petrinex.

**Key Principles:** Hydraulic fracture fluid composition data for wells fractured on or after January 1, 2013 and submitted to the AER is now being displayed at the stage level on Petrinex.

- The data is now required for supporting the Modernized Royalty Framework.
- The fracture fluid data is **only** visible to those with the appropriate Petrinex task permissions.
- Proppant data can be viewed under the **Query Well** screen by clicking the **Details** button and the **+** sign beside the **Well Hydraulic Fracturing Data** heading. Note if there is no **+** sign there is no proppant data
- The complete composition data (carriers, proppants & additives) can be requested by requesting the **Well Hydraulic Fracturing Report** under **Submit Report Request** and can be delivered in pdf, xml or csv format. (For more information on this report - see tip titled Well Hydraulic Fracturing Report)

## TIP

- If a category is blank there is no data; e.g. purpose, which is not a required field for proppant is blank.
