

Batteries and Injection Facilities Allowed to Report REC of Brackish Water from ABWS for Volumetrics

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB	March 28, 2017		Initial Release

Audience: All Alberta Stakeholders

Purpose: To notify AB stakeholders that a change will be implemented in Petrinex to allow Batteries (BT) and Injection Facilities (IF) to report a receipt (REC) of Brackish water (BRKWTR) from Water Source IDs (ABWS) identified as Brackish water (0989356) for volumetrics.

Key Principles: Currently Industry is limited to reporting a receipt (REC) of Fresh water (FSHWTR) from ABWS identified as Brackish water.

Effective March 2017 production month, Industry will have the ability to report a receipt (REC) of Brackish water (BRKWTR) from Water Source facilities (WS) for volumetrics at either a Battery (BT) or Injection (IF) facility to ensure accurate reporting..
