

Volumetrics – Addition of New Product Type ENTRAINED GAS

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
SK	June 12, 2018		Initial Release

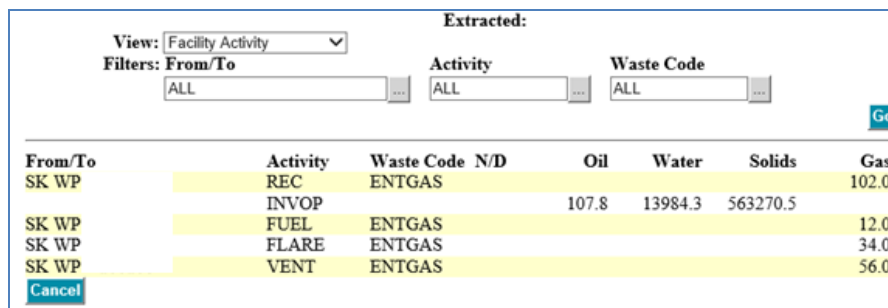

Audience: All Saskatchewan Users

Purpose: To inform Industry that Energy and Resources (ER) has added a new product type to Petrinex.

Background: Effective May production month (2018-05), ER has added a new product type ENTRAINED GAS (ENTGAS) to Petrinex. This new product type can be reported at custom treaters, terminals, injection facilities and waste plants. This product type must be used in situations when gas is received during the process of trucking liquids and there is no means to determine the origin from which the gas was received.

Operators of custom treaters, injection facilities and terminals must report VENT, FUEL, or FLARE of ENTGAS. The 'From/To' field must be filled in with the facility ID of the reporting facility. This product will not be required to balance with a corresponding Receipt (REC) at these facility types

Operators of waste plants must report an activity of VENT, FUEL, or FLARE with a waste code of ENTGAS and report the volume under GAS. This product will be required to balance therefore a corresponding REC of ENTGAS must be entered. The 'From/To' field must be filled in with the waste plant ID of the reporting waste plant. See screen shot below.

The screenshot shows a web interface for data extraction. At the top, there is a 'View' dropdown set to 'Facility Activity'. Below it are three filter fields: 'From/To' (set to 'ALL'), 'Activity' (set to 'ALL'), and 'Waste Code' (set to 'ALL'). A 'Go' button is to the right. Below the filters is a table with the following data:

From/To	Activity	Waste Code	N/D	Oil	Water	Solids	Gas
SK WP	REC	ENTGAS					102.0
	INVOP			107.8	13984.3	563270.5	
SK WP	FUEL	ENTGAS					12.0
SK WP	FLARE	ENTGAS					34.0
SK WP	VENT	ENTGAS					56.0

A 'Cancel' button is located at the bottom left of the table area.

In the future, ER will be expanding the audit of fuel, flare and vent records to ensure ENTGAS has been correctly reported at appropriate facilities.
