

**Waste Plant – Waste Location Description for Off-Site Spill
Material Location**

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
SK	April 4, 2019		Initial Release

Audience: All Saskatchewan Waste Plant Operators

Purpose: To notify operators to stop using the waste location ID description created for oilfield spill material location released during transportation.

Background: Currently, waste plant operators are able to create a waste location ID for off-site spill material that was released during transport, utilizing the description “Oilfield Spill during Transportation Release Location” in the Waste Location description drop down.

However due to functionality issues in IRIS, ER is requesting that waste plant operators **do not use** this Waste Location Description until further notice. Waste Plant Operators can continue to use all other waste location descriptions.
