

Volumetric Facility Activity Report **Additional Information**

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB/BC/SK	Aug 14, 2019		Initial Release

Audience: AB, BC and SK users

Purpose: To inform users of changes to the Volumetric Facility Activity Report effective August 7, 2019.

Background: The enhancement to the Volumetric Facility Activity Report and report request screen includes the addition of a Subtype parameter. This enhancement will require any user currently using a Saved Report file for this report to update their report parameters or their report request will fail. Users will receive a notification regarding the incorrect parameters.

Procedures: To create the new Saved Report parameter template go to Reports and Queries, Submit Report Request, select Volumetric Facility Activity Report and click Go. After creating your report parameters using the appropriate selection tools, select CSV as your report format and click the Save button. This will allow the user to save the report parameters on their desktop or a directory as a csv file. Keep in mind that facilities or wells can be deleted or added to the template at any time.

Note, when opening a csv file, the leading zeros are lost. Column C for Revision has to be changed to text format and 001 entered.
