

Changes to Report Parameters

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB, SK, BC, MB	May 20, 2020		Added new report – “Facility Operator Report” and clarified the Note under Background
AB, SK, BC, MB	May 13, 2020		Initial Release

Audience: Industry Petrinex Users

Purpose: To advise Industry users about the changes to the report selection options for the most commonly requested Petrinex reports.

Background: Changes were made to the most commonly requested Petrinex reports based on Industry feedback.

Note: If users have used the “Save Report” functionality to create a template that they use each month to request these reports, you will need to make the necessary updates to the report parameters or your report request will fail. We strongly encourage you to create new report parameters and re-save the template.

- **Allocation – OAF Report.**
 - Changes were made in Petrinex, effective February 5, 2020 to remove the submission start and end dates and restrict the number of months or facilities that can be requested.
 - Changes were made to Petrinex, effective May 5, 2020 to remove the restrictions for the number of months or facilities that can be requested.

- **Allocation – WIO Report.**
 - Changes were made in Petrinex, effective February 5, 2020 to remove the submission start and end dates and restrict the number of months or facilities that can be requested.
 - Changes were made to Petrinex, effective May 5, 2020 to remove the restrictions for the number of months or facilities that can be requested.

- **Allocation – Variance Report.**
 - Changes were made to Petrinex, effective May 5, 2020 to remove the restrictions for the number of facilities that can be requested. The maximum number of months allowed continues to be 12.

- **Volumetric Facility Activity Report.**
 - Changes were made in Petrinex, effective February 5, 2020 to remove the submission start and end dates and restrict the number of months or facilities that can be requested.
 - Changes were made to Petrinex, effective May 5, 2020 to remove the restrictions for the number of months or facilities that can be requested.

- **Volumetric Industry Extract.**
 - Changes were made in Petrinex, effective Nov 4, 2018 to provide 3 choices for the extract run times options of the Volumetric Industry Extract.
 - Daytime 6:00 a.m. MT to close
 - Nightly 5:30 p.m. MT to morning
 - After Close 9:00 p.m. MT to morning
 - Changes were made in Petrinex, effective February 5, 2020 to remove the submission start and end dates for the Volumetric Industry Extract.
 - Default Nightly run

- Due to concerns raised by Industry, changes have been made effective May 5 to return the submission start and end dates to this report. These submission dates will be “optional” with the defaults set to blank. Using the defaults (blank) will provide the most current data. If dates are supplied, only submissions made during that date range will be included in the results returned.
- **Facility Operator Report**
 - Changes were made to Petrinex, effective May 5, 2020 to add the report parameter “Facility Operational Status” to the report.
 - The new column for the facility operational status heading is "Facility Operational Status" in the CSV and "Operational Status" in the PDF (different from CSV because of the available room in the PDF).
