

IOGC Royalty/Tax Payer (RTP) Known Issues

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB	Sep 29, 2020	Background – bullet 2	Second known issue is scheduled for correction and implementation on Oct 7
AB	Sep 14, 2020		Initial Document

Audience: All AB IOGC stakeholders

Purpose: On August 5, 2020, changes were made to the Petrinex functionality for the IOGC Royalty/Tax Payer (RTP) functionality in Alberta. Effective, August 6, 2020, Industry users were required to enter the Royalty/Tax Payer information for First Nation of Interest Wells in Alberta. This update was to be effective for the July 2020 production month.

Background: There are two known issues that are being addressed:

1. Currently, the system is generating “Missing RTP” and/or “RTP does not match RTA” error messages in the warning and final report for data prior to the July 2020 production month. These reports are issued by Petrinex 2 days prior to RTP deadline at the end of August and also in the final report issued the day after the deadline.

This fix has been scheduled to be corrected and will be implemented on October 7 as part of the scheduled release implementation.

2. Users are also receiving “Missing RTP” errors for GAS. These errors can be ignored as IOGC Royalty/Tax Payer in Alberta functionality should be for OIL only, and the gas errors/warning and access will be removed from IOGC RTP in Alberta.

TIP

This fix has been scheduled to be corrected and will be implemented on October 7 as part of the scheduled release implementation.

Operators of First Nation of Interest wells will receive these error reports again in September 2020 in both the warning format (5 days prior to the RTP deadline), and the final format (day after the RTP deadline).

- Any **“OIL”** errors received in August or September 2020 for the time period prior to July 2020 are not required to be corrected as they will be removed from your reports after October 7, 2020.
- Any **“GAS”** errors in August 2020 and subsequent reports can be ignored as they will be removed from the reports after October 7, 2020.
