

SK – New Product Type of Hydrogen (HYDGN)

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
SK	October 7, 2020		Initial Release

Audience: All Saskatchewan Users

Purpose: To inform Industry that on October 7, 2020 a new product type of Hydrogen (HYDGN) was added for Saskatchewan reporting.

Background: The Ministry of Energy and Resources (ER) has added a new product type of Hydrogen (HYDGN) to Petrinex. This new product type has a unit of measure of 10³m³ and must be reported at base conditions (101.325 kPa absolute and 15 degrees Celsius). This new product type can be reported at batteries, injection facilities, terminals, gas gathering systems, pipelines, custom treaters and water source wells as of September production month (2020-08). HYDGN is not available at this time for receipts or deliveries to gas plants. Operators can report the product type of HYDGN for the DISP, FLARE, FUEL, INVCL, INVOP, INVADJ, PROD, REC and VENT activity types. The allowed miscellaneous nodes for both receipts and dispositions of HYDGN are SKIN, SKLF and SKMC.

Valuation for hydrogen must be submitted directly to ER Petroleum Royalties on a monthly basis.
