

Operator Changes – Back-date Ability for Streams (SK WI)

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
SK	February 1, 2022		Initial Release

Audience: All Saskatchewan Users

Purpose: To inform Industry of changes to the Operator Change functionality in Saskatchewan, effective February 3, 2022.

Background: The Saskatchewan Ministry of Energy and Resources has approved an enhancement to Petrinex to allow industry to back-date operatorship for well stream IDs (SK WI). This change has been made because the inability to back-date the operator change for this stream type causes an error which prevents the reporting of the Working Interest Owner (WIO) in a prior period. WIO interests can only be reported as a share of the operator's royalty/tax payer percentage. If the reported royalty/tax payer listed is different than the operator of the stream (because the operator is still the prior period operator), then no WIO interests can be reported. With this change, industry will be able to properly report the WIO information.

There will be no changes related to facility operator changes for stream IDs related to facilities, units or projects (SK BT, SK IF, SK UN, SK PJ or SK ER). Only the current or future months will be available to select for operator changes for anything other than well streams (SK WI).
