

Annual AER Methane Emissions Reporting Moving to Petrinex

Release/Revision Date	Location of Change in this Document	Comment
February 17, 2026		Initial Release

Audience: Alberta Operators

Purpose: To inform all Alberta operators that on Thursday, March 5, 2026, annual methane emissions reporting will move to Petrinex, and OneStop will only be available to amend past reports.

Background: As per [Directive 060](#), the operator of record for a facility that was active in a reporting period must electronically submit an annual methane emissions report to the AER via the AER's designated information submission system by June 1 of the following calendar year, or by the next business day if June 1 is not a business day, or as otherwise directed by the AER. This report must include the volume of vent gas emitted and other specific details related to compressor seals and emissions management.

Key Principles: Beginning March 5, all annual methane emissions reports must be submitted through Petrinex. There is no change to the Annual Methane Emissions reporting requirements, only AER's designated information submission system is changing from OneStop to Petrinex.

OneStop will remain available for amending past reports and submitting annual reports related to [Directive 039](#) and [Directive 084](#).
