

## Registry Tips

# Reminder regarding the correct format for well and facility licence numbers

Release/Revision Date	Location of change in this document	Comment
November 14, 2002		Initial Release

**Audience:** Well and facility licensees.

**Purpose:** This tip is intended to remind well and facility licensees to use the correct format for inputting well and facility licence numbers into the Registry and thereby avoid error messages.

**Key Principles:** Well licence  
A well licence is a unique licence issued by the EUB for a well. It is not the same as a facility licence.

Facility licence  
A facility licence is issued by the EUB to all oil and gas related facilities. It is not the same as the Facility ID issued by the Registry.

**Procedures:** Correct well licence format: **W**1234567 Note: even though lookups show the licence without the **W** prefix, you must include the **W** prefix when you input it.

Query Well					
Licence Number			Licensee		
<input type="text"/>			<input type="text"/>		
Well ID		Licence #	Well N		
AB	01	100772001000V400	0227515	TRF	
AB	01	100662001000V400	0227509	TRF	
AB	01	100663201208V400	0273457	TRF	
AB	01	100663201308V400	0227514	TRF	

Petroleum Registry of Alberta

Correct facility licence format: **F**1234567

In this case, the Facility Licence lookup displays the Licence Number in the correct format, i.e., with the **F** prefix.
