

Registry Tip

New “Date Received” column added to Registry’s Manage Ministry Reporting Screen

Release/Revision Date	Location of change in this document	Comment
October 04, 2004		Initial Release
October 6, 2004		Change Alert to reflect change has occurred.

Audience: All stakeholders

Purpose: This tip informs users that on October 6, 2004, a “Date Received” column is available on the Registry’s Manage Ministry Reporting screen.

Background: Before this change, the Manage Ministry Reporting screen only provided users with a “Date” column for Ministry reports.

This caused some confusion as this date indicated when the report was processed within the Ministry systems, not necessarily when it was actually available in the Registry for viewing/downloading.

Procedures: On October 6, 2004, the new “Date Received” column was added to clarify for users not only when the Ministry report has been placed in the Registry (new “Date Received” field) but also when the report was created within the Ministry system (existing “Date Processed” field).

By default, the order of the Ministry reports when you view this screen will be by “Date Processed”.
