Registry Alert

Changes to Registry Inbox Notifications

Release/Revision Date	Location of Change in this Document	Comment
August 08, 2005		Initial Release

Audience: All Stakeholders

Purpose: This Alert informs clients of changes that impact the workings of the Registry Inbox Notifications. This change is being introduced to further enhance Registry performance and to streamline the content of users' Registry inboxes.

Background: In the past, the front page of the Registry Inbox Notification screen provided details of the recipient names associated with each notification.

Key Principles: As of August 8, 2005, the Registry Inbox Notifications will no longer provide notification recipient names on its front page.

These details can be accessed in one of two ways:

1. These details will be provided when a client clicks on the Notification to open the Notification Details.
2. If the client has mail override, these details can again be made available by:
 - Removing their name from the "notification recipient" area.
 - Click "GO"
 - The Registry Inbox Notification screen will then provide details of all recipients for each notification listed.

Petroleum Registry of Alberta

NOTE: The date range default for this override will provide notifications from the previous day to the current date. The date range can be changed or deleted to include desired notifications.
