## Registry Alert

# Changes to SAF/OAF Allocation Groupings for Gathering Systems

Release/Revision Date	Location of Change in this Document	Comment
September 02, 2005		Initial Release

**Audience:** All Stakeholders.

**Purpose:** This Alert informs users of changes to the SAF/OAF allocation process that will see the same allocation product grouping for C5-SP at gathering systems (GS) as there are at Gas Plants (GP).

**Background:** In April 2005, changes were made to the allocations screens to recognize/include any Oil or Condensate volumes when using a C5-SP allocation at a Gas Plant. Based on Industry feedback, this functionality has now been extended to also include Gathering Systems.

**Key Principles:** As of September 2, 2005, the SAF/OAF Allocation process grouping rules will be updated to allow C5-SP to be used for Oil, Condensate, IC5-SP, NC5-SP and C5-SP at a GS, as well as a GP.

**More information:** Please contact the Registry Service Desk.
