

Volumetric Deficiency Invoice Review - Improved Handling of Blank Review ID

Jurisdiction	Published Date	Location of Change in this Document	Comment
AB	October 07, 2026		Initial Draft

Purpose:

Effective October 8, 2026, enhancements as directed by the Alberta Energy Regulator were implemented in Petrinex to now validate the Volumetric Deficiency Invoice Review ID field when the field is left blank on the Edit Volumetric Deficiency Invoice Review or Query Volumetric Deficiency Invoice Review screens.

Background:

Previously, when a user accessed either the Edit Volumetric Deficiency Invoice Review or Query Volumetric Deficiency Invoice Review screen and left the Review ID field blank, and clicked Go, Petrinex did not properly validate the missing value. Instead of displaying a validation message, Petrinex produced an unexpected event error.

Key Principles:

Petrinex has now been enhanced to validate a blank Review ID field. When a user leaves the field blank and selects Go, Petrinex now displays the following validation error:

VDR001 – The Volumetric Deficiency Invoice Review ID [] does not exist in Petrinex.

Users should always enter a valid Volumetric Deficiency Invoice Review ID before clicking Go to retrieve a specific review.
