

Receipts From AB CO (Commercial) Not Permitted

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
AB	January 10, 2025		Initial Release

Audience: Alberta Stakeholders

Purpose:

Effective January 9, 2025, Petrinex will no longer allow the reporting of receipts from AB CO (Commercial). These changes were made by the Alberta Energy Regulator (AER) in order to align with the definition of the miscellaneous code AB CO in [AER Manual 011 \(Table 6\)](#).

Background:

Prior to this update and contrary to the Manual 011 Table 6 (Miscellaneous codes) definition of AB CO, Petrinex allowed operators to report receipts of gas or helium at their facilities from AB CO. Petrinex functionality will now align with the Manual 011 AB CO definition and not allow receipts to be reported from AB CO at any facility.

Key Principles:

Effective, January 9, 2025, operators will receive an error if they try to report a receipt at their facility from AB CO, since the Manual 011 definition of AB CO only permits dispositions to AB CO for certain purposes (see Table 6 in Manual 011 for more details).
