

Query and Edit Well Status - Enhanced Display of Facility Links

Jurisdiction	Published Date	Location of Change in this Document	Comment
All	September 4, 2026		Initial Release

Purpose:

To inform industry users of a display enhancement made to the Query and Edit Well Status screens, implemented with the August 5, 2026, Petrinex release.

Background:

Previously, when a well was associated with more than one facility, the facility links were displayed together on a single row sharing a single link start date. In cases where the links had different start or end dates across facilities, the display could be misleading, one facility's date would appear to apply to a link it did not actually correspond to.

With this enhancement, each facility link is now displayed on its own separate row, with its own corresponding link start date and link end date. This ensures that where a well is linked to two or more facilities, the dates for each link are shown clearly and accurately against the correct facility link.

This is a display change only, there is no change to the facility link data held in Petrinex, or to how well to facility links are reported. No action is required.

Previous Display

Query Well Status

Well ID: AB WI 102212704124W402
 Name: 102212704124W402
