PETRINEX
CANADA'S PETROLEUM INFORMATION NETWORK

TIP

Royalty Tax Attribute Information Available on Petrinex

Jurisdiction	Release/Revision Date	Location of Change in this Document	Comment
SK	February 8, 2018		Initial Release

Audience: All Saskatchewan Users

Purpose: To inform Industry that the Ministry of the Economy (ECON) has implemented a change in Petrinex to provide Royalty/Tax Attribute (RTA) information to Industry through the query functionality in Petrinex.

Background: When ECON implemented the Integrated Resource Information System (IRIS) in 2015 the decision was made to remove the majority of the RTA information from Petrinex. At that time, ECON had some concerns regarding the data integration functionality required to send the information to Petrinex.

Key Messages: Detailed RTA information can now be viewed on the RTA query screen in Petrinex. All of the RTA data that was previously available in Petrinex will be available for query once again. In addition, industry will have the ability to see the remaining incentive volume for a well with a completion level incentive. For a well with a well level incentive volume, industry will still need to log on to IRIS in order to view the incentive details.

Note that the RTA query is date effective. Please ensure you are entering the correct date relative to the period you are querying.
